

WHAT IS CLAIMED IS:

1. A telephone terminal device comprising:  
a temporary storage memory for temporarily storing an  
inputted telephone number; and

5 a plurality of telephone directory memories, each storing  
input telephone numbers;

wherein a telephone number stored in the temporary  
storage memory is registered in one selected from the plurality  
of the telephone directories after making a call.

10 2. A telephone terminal device as claimed in claim 1,  
wherein name and information related to the telephone number  
registered are added thereto.

15 3. A telephone terminal device as claimed in claim 1,  
wherein data of at least one of the telephone directories are  
erased automatically after passage of a predetermined time.

20 4. The telephone terminal device as claimed in claim  
1, further comprising:

a transmitted telephone number record memory for storing  
a plurality of telephone numbers called; and

a buffer memory, whose data are erased automatically  
after passage of a predetermined time,

25 wherein telephone numbers are registered in the

transmitted telephone number record memory in the order of call,  
and in the case the number of the telephone numbers to be registered  
exceeds the number capable of being stored in the transmitted  
telephone number record memory, the telephone number of the oldest  
5 registration order or a telephone number specified by the user  
is displaced from the transmitted telephone number record memory  
to the buffer memory for reregistration.

5. The telephone terminal device as claimed in any of  
10 claims 1 to 4, further comprising an interface means for connection  
with an external memory device.

6. The telephone terminal device as claimed in claim  
5, wherein at least one of the telephone directory memories  
15 comprises an external memory device connected with a telephone  
terminal device main body via the interface means.

7. The telephone terminal device as claimed in any of  
claims 1 to 4, wherein the telephone directory memory for  
20 registering the telephone number stored in the temporary storage  
memory after a call is selected manually from the plurality of  
the telephone directory memories.

8. The telephone terminal device as claimed in any of  
25 claims 1 to 4, wherein the telephone directory memory for

registering the telephone number stored in the temporary storage memory after a call is selected preliminarily from the plurality of the telephone directory memories so that the telephone number stored in the temporary storage memory is registered

- 5 automatically in the preliminarily selected telephone directory memory after each call.
